Interface	USB Port (USB Spec. 1.1 or 2.0 protocol)
Graphic Card	SVGA

## P-touch 2430PC

### The need for labelling

**There are hundreds of applications for durable, colour coded P-touch labels in the home, office and place of work**

Improve efficiency by locating clearly labelled file folders, CD/DVD cases and other information quickly. Save time by labelling your telephone with frequently dialled numbers. Place your name on personal possessions to ensure borrowed items are returned. Where there is a need for organisation, there is a need for a P-touch label!

### Built-in software does not need installing

Most printers and other peripherals require complicated installation of software and drivers before they can be used; however, Brother has used the same technology found in USB flash memory drives within the P-touch 2430PC. As the label design software is stored inside the labelling machine, whenever you connect the USB cable to your PC simply click on the pop-up message to launch the software. This ensures that corporate PCs with restrictions on installing programs can even run the software, whenever required.

- ❖ No virus concerns
- ❖ Easily share with others

### The simple, three-step process to label printing...

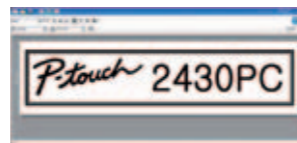

- 1 Connect the P-touch labelling machine to your Microsoft Windows PC

- 2 Simply click on the pop-up message to run the built-in P-touch Editor Lite label design software

- 3 Create your label and then print

### P-touch Editor Lite Features:

- Designed for Windows PCs
- Uses any installed True Type font
- Add logos, images, clipart and frames to your labels
- Use the screen capture function to clip images and text from websites
- Easy to use

### Compact, elegant and easy to use

The P-touch 2430PC redefine personal label printing. Their compact design uses little desk space, so they fit perfectly at the side of your monitor; they can be powered from standard batteries or an AC adapter. Create personalised, durable labels whenever and wherever they are required.

### P-touch 2430PC additional features

The P-touch 2430PC has valuable additional features, including the capability to print labels up to 24mm in width. The built-in cutter is particularly useful when printing many labels at once — each one is cut to the correct length automatically. The P-touch 2430PC is also supplied with an AC adapter as standard, and a CD containing the Professional P-touch Editor 5.0 software.

### Professional software

P-touch Editor 5.0 is Brother's professional label editing software, allowing the printing of labels directly from Microsoft Word / Excel / Outlook. Barcodes can be added to your labels and, as both models can use batteries, this combination makes an ideal labelling solution for asset management through a portable laptop.

This powerful software is supplied on CD or is available to download from <http://solutions.brother.com>

### Feature Chart

Features	P-touch 2430PC
